

Stat-X[®]

Aerosol Fire Suppression

PRODUCT CATALOG

The Stat-X® product offerings cover a wide range of enclosed special hazard fire protection applications, and we also offer a personal protection device, the Stat-X First Responder® for use for by professional fire responders. This catalog was created to help simplify the choices and to show photos of the various components.

All of our products are designed and installed by one of our trained and certified distributor partners.

Our distributors' contact information is available at www.statx.com.

Thermal/Manual and Manual ONLY Generators

Thermal/Manual Generators

These are our automatic units which are thermally activated. They self-activate when they reach a pre-selected temperature which is determined by the thermal head temperature chosen.

They can also be configured to activate manually with a cable pull system. See page 7-11.

Part Number	Description
15300	30T generator
15311	60T Long generator
15410	100T generator
15510	250T generator
15511	250MT generator

Manual/Thermal Actuation Heads

Part Number	Description
20102	M/T Head 158°F/70°C horizontal pull, ALUMINUM
20103	M/T Head 158°F/70°C vertical pull, ALUMINUM
20104	M/T Head 203°F/95°C horizontal pull, ALUMINUM
20105	M/T Head 203°F/95°C vertical pull, ALUMINUM
20106	M/T Head 254°F/123°C horizontal pull, ALUMINUM
20107	M/T Head 254°F/123°C horizontal pull, ALUMINUM
20112	M/T Head 158°F/70°C horizontal pull, BRASS
20113	M/T Head 158°F/70°C vertical pull, BRASS
20114	M/T Head 203°F/95°C horizontal pull, BRASS
20115	M/T Head 203°F/95°C vertical pull, BRASS
20116	M/T Head 254°F/123°C horizontal pull, BRASS
20117	M/T Head 254°F/123°C vertical pull, BRASS

Manual Only (Pull) Actuation Heads

Part Number	Description
14654	Manual only head, vertical pull, BRASS
14655	Manual only head, horizontal pull, BRASS

Thermal Switches

Part Number	Description
14670	Thermal switch 257° F/ 125° C normally open
14680	Thermal switch 257° F/ 125° C normally closed

The thermal switches we offer are meant to be used with thermally actuated Stat-X generators to provide a dry contact interface point for shutting down process equipment and/or HVAC equipment in a protected area or to monitor a Stat-X generator for notification that it has discharged. The thermal switches are one-time use devices that should be attached to the discharge port-end of a Stat-X generator. When the generator discharges the heat of the aerosol agent and the generator will activate the switch.

Cable Pull Rope Assemblies

Part Number	Description
14682	300°F 3ft cable pull assembly, red T-handle
14681	300°F 12ft cable pull assembly, red T-handle
14667	300°F 40ft cable pull assembly, red T-handle
14668	300°F 12ft cable pull assembly, extender
14669	300°F 40ft cable pull assembly, extender
14686	200°F 3ft cable pull assembly, black T-handle
14689	200°F 6ft cable pull assembly, black T-handle
14687	200°F 12ft cable pull assembly, black T-handle
14688	200°F 40ft cable pull assembly, black T-handle
14683	Weather-resistant plastic wall-mount cover box
14663	Cable tee pulley
14685	Oval sleeve SS (package of 10)
14664	Oval sleeve tin-plated copper (package of 50)
14684	Steel 3" corner L-brackets (for 300°F cables only)
14698	Recessed stainless open cup

Stainless oval sleeve crimp 300°F rated bowden cable pull rope with red T-handle & extender cable rope.

Cable pull rope end is looped through the T-model activator cotter pin manual release and crimped with a choice of stainless or tin-plated copper oval sleeve. Cable bulkhead fittings must be properly anchored. Thermal switch is an optional electrical contact to indicate released status.

This is the 200°F rated bowden cable pull rope with black T-handle.

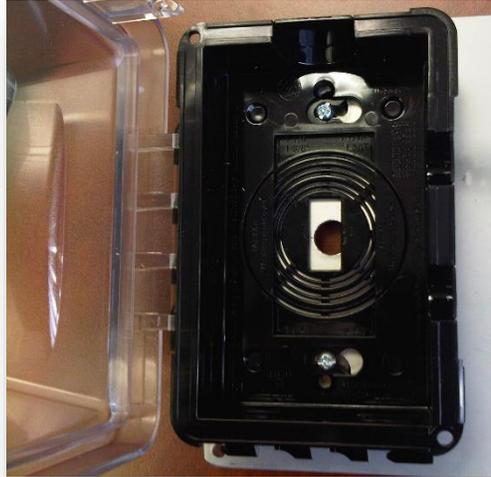

Cable tee pulley (PN: 14663) will accept a T-handle cable pull rope as input and two extender cables as outputs. This permits one T-handle to pull the cotter pins of 2 thermal/manual head activators. Tiered use of multiple tee pulleys is possible.

Aerosol Fire Suppression

Cable pull polycarbonate cover box includes clear cover. Intended for bulkhead surface mount and includes vertical and horizontal hinges for snap-on cover. Cover can be locked or fitted with breakable tamper seal (not supplied). T-handle cables have removable knobs and bulkhead fittings for penetration mounting.

Recessed stainless steel open cup (PN: 14698) can be used with black T-handle cable pull for use with consoles.

Please refer to our thermal/manual owner's manual and the automatic design manual for more technical information.

Electrical Generators

Electrically Operated Generators

These are our electrically operated generators. These “E” models need to be part of a fire system including detection and controls. They are designed with a fire alarm/releasing panel.

Part Number	Description
15100	30E generator
15110	60E generator
15111	60ME (long) generator
15120	100E generator
15130	250E generator
15530	250ME generator
15140	500E generator
15150	1000E generator
15550	1000ME generator
15160	1500E generator

Stat-X[®] EX

Aerosol Fire Suppression

Electric Generator Series for Classified Hazardous Areas

Stat-X[®] EX Electric Generator Series for Classified Hazardous Areas

With our new UL Class I, Division 2, UL ATEX certificate, and UL IECEx certificate, Stat-X electric operated aerosol fire suppression units are now certified to be in enclosed environments classified as a hazardous area. These units are certified by UL and are authorized to bear the both the UL Listing mark for Canada and the United States, Class I, Division 2, as well as IECEx, and the ATEX mark.

This certification does not include the Stat-X thermal/manual operated units nor the Stat-X First Responder[®] portable devices.

This new product line will be referred to as our Stat-X EX electric model aerosol fire suppression units. This product line complements, but does not supersede, our current line of UL/ULC listed E-model Stat-X aerosol fire suppression units. The Stat-X EX final product is fitted with a choice of factory installed 3/4" NPT or M25x1.5mm male stainless steel or brass 90° elbow threaded connections.

This product line is applicable for all of our current applications (<https://www.statx.com/applications/>) with the exception of the explosive dust concentrate areas.

Protect your hazardous area with our automatic fixed fire suppression systems in the following industries.

- Onshore Oil & Gas
- Military
- Power Generation
- Flammable Liquid and Hazardous Material Storage
- Battery Storage
- Laboratories
- Painting
- Transportation

ELECTRICAL UNITS for Hazardous Locations

Part Number	Description
11880	30E, CLI DIV2/Zone 2, brass 90° elbow
11890	60E, CLI DIV2/Zone 2, brass 90° elbow
11900	60E Long, CLI DIV2/Zone 2, brass 90° elbow
11910	100E, CLI DIV2/Zone 2, brass 90° elbow
11920	250E, CLI DIV2/Zone 2, brass 90° elbow
11930	500E, CLI DIV2/Zone 2, brass 90° elbow
11940	1000E, CLI DIV2/Zone 2, brass 90° elbow
11950	1500E, CLI DIV2/Zone 2, brass 90° elbow
11960	2500E, CLI DIV2/Zone 2, brass 90° elbow
11885	30E, CLI DIV2/Zone 2, 316SS 90° elbow
11895	60E, CLI DIV2/Zone 2, 316SS 90° elbow
11905	60E Long, CLI DIV2/Zone 2, 316SS 90° elbow
11915	100E, CLI DIV2/Zone 2, 316SS 90° elbow
11925	250E, CLI DIV2/Zone 2, 316SS 90° elbow
11935	500E, CLI DIV2/Zone 2, 316SS 90° elbow
11945	1000E, CLI DIV2/Zone 2, 316SS 90° elbow
11955	1500E, CLI DIV2/Zone 2, 316SS 90° elbow
11965	2500E, CLI DIV2/Zone 2, 316SS 90° elbow

These are available from the 30EX to the 2500EX, except the 250ME.

System Signs

These are our typical warning signs. You can find these in our design manual. If you are complying with a standard, please make sure you are familiar-with the requirements for installation and design to ensure you meet the requirements for the fire protection system.

This information is provided in the standard.

All signs have rounded corners.

Generator Mounting Brackets

Bracket Size	Electrical Generators	Thermal Generators
2" Bracket	30E, 60E, 60E Long	30T, 60T, 60T Long
3" Bracket	100E, 250ME	100T, 250MT
5" Bracket	250E, 500E, 1000ME	250T, 500T, 1000MT
8" Bracket	1000E, 1500E, 2500E	N/A

The standard bracket is used for building applications.

Our heavy-duty bracket is like the standard bracket. The heavy-duty bracket has a reinforced band clamp. This band clamp over the sleeve reinforces it in shock and vibration applications. The heavy-duty bracket is used for transportation applications.

Part Number	Description
18001	2" Bracket
18002	2" Bracket – single mount
18005	3" Bracket
18006	3" Bracket – heavy duty
18010	5" Bracket
18011	5" Bracket – heavy duty
18015	8" Bracket
18016	8" Bracket – heavy duty
18275	8" Wall Penetrator bracket
18275 B	8" Wall penetrator bracket with sunshield
18283 A	Standard unit clamp (default with PN 18275)
18283 B	Sunshield unit clamp (default with PN 18275 B)
18288	Rupture diaphragm (replacement Mylar membrane)

Mounting Brackets

2" Mounting Bracket fits 30T/E & 60T/E generators

PN: 18001 Only available in standard.

PN: 18002 Standard Single Mount

3" Mounting Bracket – Fits 100T/E & 250MT/ME generators

Standard
PN: 18005

Heavy Duty
PN: 18006

5" Mounting Bracket fits 250T/E, 500T/E, and 1000MT/ME generators

Standard
PN: 18010

Heavy Duty
PN: 18011

8" Mounting Bracket fits 1000E, 1500E, 2500E generators

Standard
PN: 18015

Heavy Duty
PN: 18016

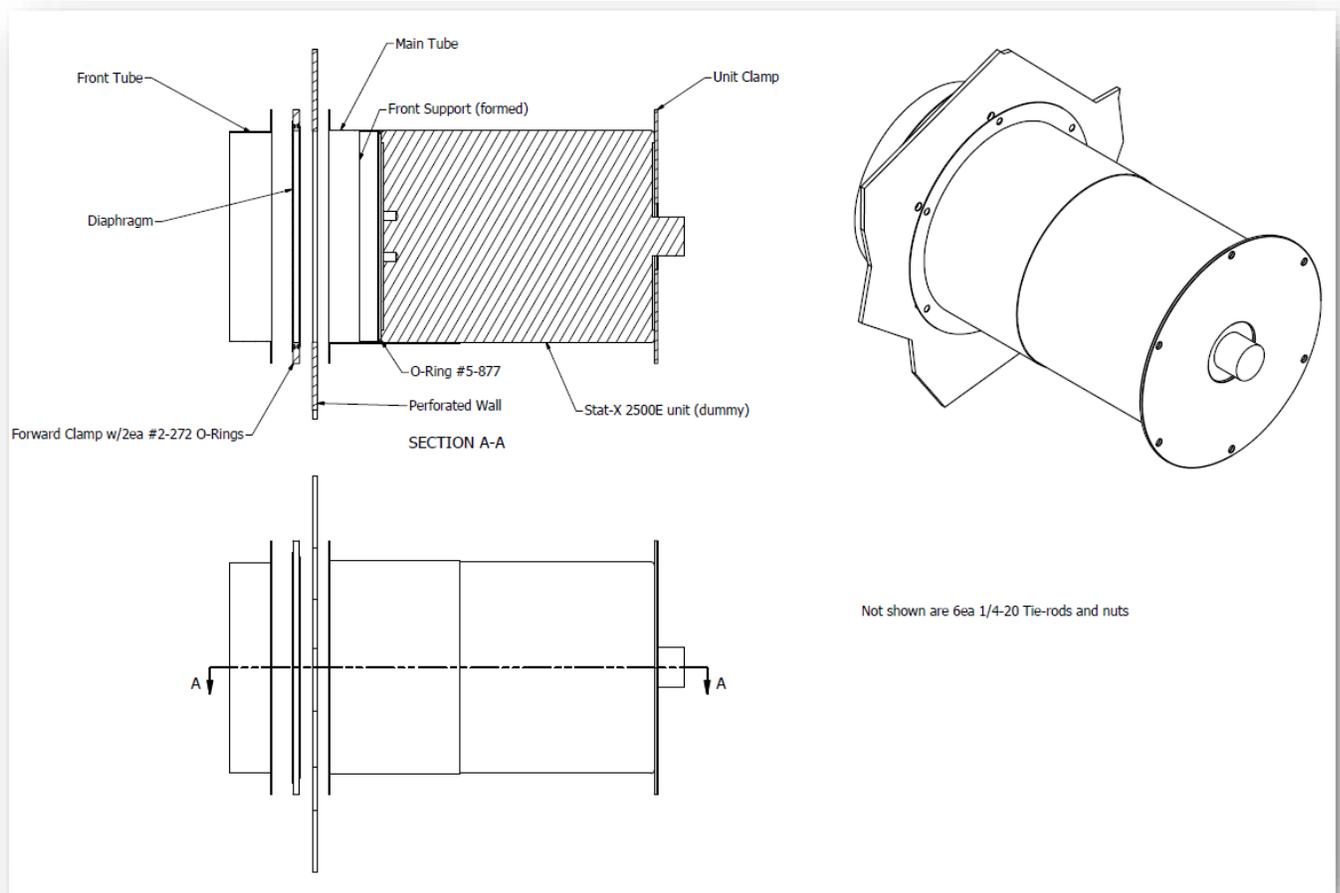

Refer to the appropriate owner's manual and design & installation manual for proper clearance zones, mounting configurations, and installation guidelines.

Penetrator Bracket Assemblies

Penetrator bracket assembly for 1000E, 1500E, and 2500E Stat-X generators only
PN: 18275

This bracket is used to mount Stat-X generators in a sidewall of the protected space so that they are outside the area.

There is extra threaded rod length to accommodate with wall thickness variations.

Accessories

Cable Adapter

Cable adapter 3/4" NPT
PN: 14640

The cable adapter can be used for connecting releasing circuit wiring from a junction box to the 3/4" threaded coupling on electric operation Stat-X aerosol generators. It has a cable gland that will tighten around releasing circuit wiring.

Generator Protective Covers

Part Number	Description
14810	Protective cover, 2" for 30E/60E
14811	Protective cover, 3" for 100E
14812	Protective cover, 5" for 250E/500E
14813	Protective cover, 8" for 1000E/1500E/2500E

The protective covers we offer are optional peel and stick products that can be installed on the discharge port end of Stat-X aerosol generators to provide additional protection when they are going to be installed in harsh environments.

Covers should be installed within five (5) years of the manufacturing date. Preparation should ensure the generator surfaces are well cleaned and free of grease, oil, and other contaminants.

Control Panels and Associated Components

Potter PFC-4410RC Fire Suppression System Control Panel

Part Number	Description
3006142	Potter PFC-4410RC conventional fire suppression system control panel
5090155	Bezel for flush mounting the control panel
3005012	Spare EOL resistor diode assembly (one is required per release circuit; the control panel comes with two)

This fire suppression control panel can release up to forty (40) Stat-X aerosol generators simultaneously. When using this panel to release more than twenty (20) Stat-X aerosol generators, please refer to our Technical Bulletin 14.5 revision two for information on what panel programs and additional system components are required to do so or contact our technical support team.

Control Panel Batteries

Two batteries are required per control panel.

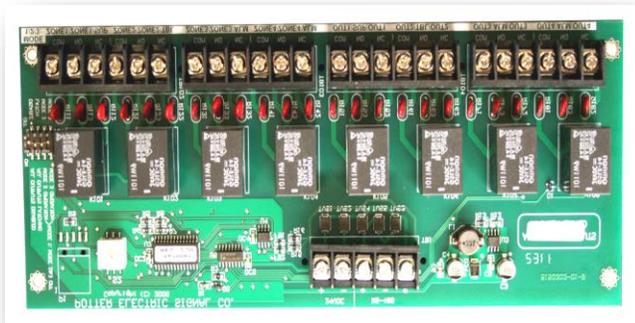

Part Number	Description
5130092	Battery (12V) 5.0 AH
5130084	Battery (12V) 8.0 AH
5130090	Battery (12V) 12.0 AH
5130086	Battery (12V) 18.0 AH

Relay Modules

Potter ARM-44 Relay Module (8 form-C relays)

PN: 3006221

This expansion relay module for use with the PFC-4410RC panel provides additional dry contact relays for shutting down process equipment and HVAC systems upon a Stat-X fire suppression discharge.

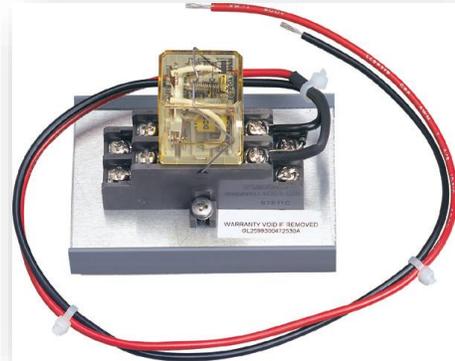

Aerosol Fire Suppression

Potter ARM-2 Relay Module

PN: 3004725

The ARM-2 auxiliary relay module is a non-supervised DPDT Relay designed to be activated by 24VDC Indicating and/or releasing, polarity reversing circuits. The module can be used for fan shutdown, equipment shutdown door release, elevator recall, etc. When the ARM-2 module is used the additional power required for this relay module must be subtracted from the total available circuit current.

Switches

Potter Release Circuit Disable Switch

PN: 3001002

This device is used to bypass releasing circuit from a Potter PFC-4410 RC panel, a MOM-4 addressable monitored output module, or a NAC circuit on a PSN-100 that is being used as a release circuit to Stat-X aerosol generators.

Conventional Abort Switch

PN: 3001000

Abort switches are used to abort a system discharge when the fire suppression control panel is in its programmable discharge delay sequence that is activated after the control panel is in a confirmed fire suppression system release condition. When using this switch with a Potter PFC-4410RC control panel, activation of the abort circuit stops the pre-discharge timer at ten seconds. If there is less than ten seconds remaining, the time goes back to ten seconds. Releasing the abort switch starts the discharge delay timer again at ten seconds. If this device is going to be used with a Potter addressable fire suppression system control panel it should be interfaced to an I/O circuit on the main board of the control panel.

Conventional Fire Alarm Pull Stations

Fire alarm pull stations provide the ability for building occupants to manually put the building fire alarm system into an alarm condition.

Stat-X systems should be installed with a pull station labeled as "FIRE SUPPRESSION RELEASE" rather than "FIRE ALARM".

Conventional Manual Release Station
PN: 1000655

Model RMS-IT-LP Red SPST Dual Action Manual Release Station with "FIRE SUPPRESSION RELEASE" lettering

Manual release stations are typically installed at each point of egress from a space that was going to be protected by a Stat-X fire suppression system. When activated, a manual release station will cause the fire suppression control panel to immediately discharge the Stat-X fire suppression system. If this device is going to be used with a Potter addressable fire suppression system control panel it must be either supervised using an addressable monitor module on the SLC loop or tied into an I/O circuit on the main board of the control panel.

The version for outdoor or wet conditions is PN: 1000401

Aerosol Fire Suppression

Special Case Pull Station

PN: 1000476

The Potter 1000476 is marked “FIRE ALARM” and may be used for rare or special cases where both the pull stations are used. The 1000476 to trigger the first fire alarm (in a cross-zoned system) and the 1000655 as an emergency manual release override.

Part Number	Model	Description
1000655	RMS-1T-LP Red	Standard pull station – indoor use dual action manual release station with “FIRE SUPPRESSION RELEASE” lettering
1000627	RMS-1T-WP-LP Red	Standard pull station – outdoor or wet use Marked with “AGENT RELEASE”
1000401	RMS-1T-WP	Single action, weatherproof, SPST, hex-key reset
1000476	P32-1T-LP	Dual action “FIRE ALARM”, SPST, hex-key reset, red
1000444	P32-BB	Surface mount back box
1000445	P32-DBB	Deep surface mount back box

Powered Spot-Type Conventional Fire Detectors

Part Number	Model	Description
1430036	CPS-24	Conventional photoelectric smoke detector
1430012	PS-24H	Photoelectric smoke/heat combo (requires base)
1430014	SB-46	Smoke detector base, 6" 46 mA (for CPS-24 and PS-24H series)
1000140	CR-135	Combo rate of rise/fixed temp 135°F/57°C heat detector
1000141	CR-200	Combo rate of rise/fixed temp 200°F/93°C heat detector
1000142	CF-135	Fixed temperature 135°F/57°C heat detector
1000143	CF-200	Fixed temperature 200°F/93°C heat detector

Aerosol Fire Suppression

Thermotech Conventional Spot-Type Heat Detectors

Part Number	Description
302-135	135°F fixed temperature vertical mount
302-194	194°F fixed temperature vertical mount
302 ET-135	135°F fixed temperature vertical mount, all weather, 1/2" conduit
302-ET-194	194°F fixed temperature vertical mount, all weather, 1/2" conduit
302-AW-135	135°F fixed temperature vertical mount, all weather
302-AW-194	194°F fixed temperature vertical mount, all weather
302-EPM-135	135°F fixed temperature vertical mount, explosion proof
302-EPM-194	194°F fixed temperature vertical mount, explosion proof

We recommend that the fastest responding type of fire detection device that fits the protected hazard area be used to release Stat-X fire suppression systems. Spot-type heat and smoke detector device spacing, and installation requirements are to be per the guidelines of the device manufacturer, in accordance with the requirements of the NFPA 72, and/or in accordance with the requirements of the AHJ.

Potter Horn/Strobes

Audio-visual alarm devices are used as general fire alarm annunciation devices as part of building fire alarm systems, and they are also typically installed inside the protected space that is being protected by a Stat-X fire suppression system. AHJs can also require these devices to be provided outside each point of egress from a space that is protected by a Stat-X fire suppression system.

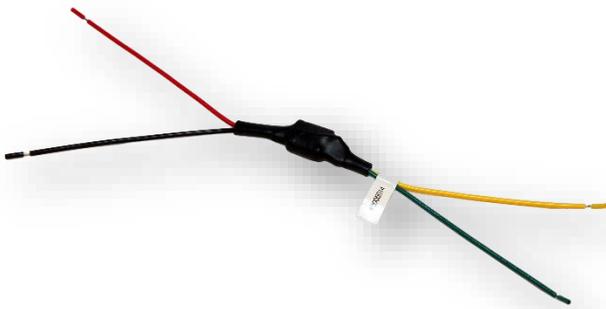

Part Number	Model	Description
4890010	S-24WR	Strobe wall mount, red
4890011	S-24WW	Strobe wall mount, white
4890012	S-24PWR	Strobe wall mount, plain housing, red
4890050	S-24WR-WP	Strobe outdoor wall mount, w/backbox, red
4890030	HS-24WR	Horn/strobe wall mount, red
4890031	HS24WW	Horn/strobe wall mount, white
4890032	HS24PWR	Horn/strobe wall mount, plain housing, red
4890060	HS-24WR-WP	Horn/strobe outdoor wall mount w/backbox, red
4890061	HS-24WW-WP	Horn/strobe outdoor wall mount w/backbox, white
4890262	Bezel	“AGENT” bezel for the horn strobe

Potter Releasing Control Accessories

Ematch Protection Device

PN: 3005014

An ematch protection device is required to be installed before each E model Stat-X aerosol generator on Stat-X fire suppression system releasing circuits on all UL listed systems. This device is used to protect Stat-X aerosol generator from power surges such as lightning strikes. For instructions on how to install this device please refer to our Technical Bulletin 23.1.

Test Match

PN: 14590

Test matches can be used as part of a functional system test for a Stat-X fire suppression system. One test match is put in place of each E model Stat-X aerosol generator on the releasing circuit(s) in order to perform a functional test of a Stat-X fire suppression system. For instructions on how these devices should be used please refer to our Technical Bulletin 24.2. Please note that these devices are one-time use devices.

Fire Alarm Control Panel

Potter ARC-100 Fire Alarm Control Panel

Potter Signal just introduced a new product line of panels. This panel has other components as noted below and on the price list.

The ARC-100 is an analog/addressable releasing fire alarm system with a total system capacity of 100 addresses. Additional capacity on the system is achieved using multi-point SLC modules. The control panel utilizes the exclusive Potter protocol that includes a complete line of sensors and modules. Each SLC may be comprised of any combination of smoke sensor, heat detectors or modules and allows for a total of 50 ohms of impedance and may use any wire compliant with the National Electrical Code (NEC). The ARC-100 has a 5 Amp.

The ARC-100 product line is available and compatible with Stat-X generators. As you can see on page 32 of the installation manual, Stat-X is compatible for a "maximum ten (generators) per release circuit."

Aerosol Fire Suppression

Part Number	Description
3992753	ARC-100, Addressable FACP, 100 point
3992733	PAD 100 Photo Detector
3992734	PAD 100 Photo/Heat Detector
3992735	PAD 100 Heat Detector
3992712	PAD 100 Duct Relay Detector, 4 wire
3992713	PAD 100 Duct Detector, 2 wire (not for PAD11-DRTS; use PAD100-LEDK for remote purposes)
3992732	PAD 100 6" Base
3992731	PAD 100 4" Base
3992730	PAD 100 Isolator Base
3992728	PAD 100 Relay Base
3992729	PAD 100 Sounder Base
3992735	PAD 100 CO Detector
3992700	PAD 100 Micro Input Module
3992721	PAD 100 Pull Station, Single Action
3992720	PAD 100 Pull Station, Dual Action
3992704	PAD 100 Single Input Module
3992703	PAD 100 Dual Input Module
3992701	PAD 100 Two Relay, Two Input
3992707	PAD 100 Notification Appliance Circuit
3992706	PAD 100 Zone Module
3992708	PAD 100 Isolator Module
3992705	PAD 100 Relay Module
3992710	PAD 100 Addressable LED Module
3992724	PAD 100 Speaker Module
3992709	PAD 100 LED w/ Keyswitch
3992711	PAD 100 Duct Remote Test (use with PAD100-DUCTR)
3992702	PAD 100 One Relay, One Input

Control Panel Batteries

Two batteries are required for each control panel, and the control panels will house up to 18 AH batteries. Larger batteries require a separate battery cabinet.

Part Number	Description
5130092	Battery (12V) 5.0 AH
5130084	Battery (12V) 8.0 AH
5130090	Battery (12V) 12.0 AH
5130086	Battery (12V) 18.0 AH

Compact Control Panels

Avantis MICRO and Avantis Ti

Part Number	Description
34620	Avantis Ti (Touch Interface)
34621	Avantis MICRO (240V)
34622	Avantis MICRO (110V)
34623	Power Supply Unit 240/110 VAC Input, 24VDC Output

Avantis MICRO

The Avantis MICRO can be installed as a standalone suppression panel with minimal signaling and configurability. It can also be placed in a digitally addressable MODBUS network alongside a Avantis Ti to form a system that offers superior signaling, ease of use and configurability

Avantis Ti

The AVANTIS Ti user interface module is used to provide the Avantis MICRO with greater onsite programmability. This consists of a custom injection molded enclosure and 4.3" resistive touchscreen providing the most modern looking front-end information point possible.

The Avantis Ti provides a cutting-edge user interface allowing programming, monitoring and alarm warnings of fire and fault conditions. Plus, service schedule alarm notification. The Ti can be connected with up to eight Avantis Micro units on a single data/power cable.

There will be multiple language user options available.

SDRP Panel

PN: 830001

The SDRP provides automatic fire detection and releasing capability for up to four (4) Stat-X generators without the need for direct power connection. Replaceable internal lithium batteries supply power to the control panel for up to three (3) years in service, even after storage. Dual detection and release zones are provided for both automatic and manual actuation of the fire suppression system, as well as a manual release for both zones simultaneously. The SDRP is specifically designed for rugged commercial and military on and off-road vehicle use.

Part Number	Description
830001	SDRP Control Panel, Battery Powered, Mil Connector
830002	Test module
830003	Switch, Toggle Manual Release, Mil
830006	Control Panel Cable Assy, - Battery Powered Panel
830007	End of Line Resistor Assy, 470k
830009	Battery Kit, Replacement for 830001, LiSOCl
830010-135	Sensor, Spot Thermal, Thermotech 135 deg F Vertical Internal
830010-194	Sensor, Spot Thermal, Thermotech 194 deg F Vertical Internal
830011-135	Sensor, Spot Thermal, Thermotech 135 deg F Vertical All Weather
830011-194	Sensor, Spot Thermal, Thermotech 194 deg F Vertical All Weather
830012-135	Sensor, Spot Thermal, Thermotech 135 deg F Vertical All Weather 1/2 Conduit
830012-194	Sensor, Spot Thermal, Thermotech 194 deg F Vertical All Weather 1/2 Conduit
830013-135	Sensor, Spot Thermal, Thermotech 135 deg F Explosion Proof
830013-194	Sensor, Spot Thermal, Thermotech 194 deg F Explosion Proof
830020-05	Linear Thermal Wire, 5 ft., 155°F Type XCR

Aerosol Fire Suppression

Part Number	Description
830020-10	Linear Thermal Wire, 10 ft., 155oF Type XCR
830021-05	Linear Thermal Wire, 5 ft., 190oF Type XCR
830021-10	Linear Thermal Wire, 10 ft., 190oF Type XCR
830022-05	Linear Thermal Wire, 5 ft., 220oF Type XCR
830022-10	Linear Thermal Wire, 10 ft., 220oF Type XCR
830023-05	Linear Thermal Wire, 5 ft., 280oF Type XCR
830023-10	Linear Thermal Wire, 10 ft., 280oF Type XCR
830024-05	Linear Thermal Wire, 5 ft., 356oF Type XCR
830024-10	Linear Thermal Wire, 10 ft., 356oF Type XCR
830025-05	Linear Thermal Wire, 5 ft., 135oF Type XLT
830025-10	Linear Thermal Wire, 10 ft., 135oF Type XLT
830100	Demo Board, FTS panel with spot thermal sensor & linear thermal wire

The data sheets for all components are available in the distributor portal.

Solo Ultra Control Panel

PN: 14692

Part Number	Description
14692	Solo Ultra

The Solo Ultra has effectively eliminated spurious activation which can occasionally be caused by the inherent characteristics of microprocessors, semiconductor power switches. Our tamper evident tag technology and our strict electronic design rules have proven highly effective. To eliminate the inherent hazards of microprocessor control the Solo Ultra uses a fully parallel path programmable logic device, which is coded using a language called VHDL, commissioned by US DOD and used for high reliability and safety critical applications.

Aerosol Fire Suppression

FS12 Panel

PN: 34600

Part Number	Description
34600	FS12 Marine Panel

The FS12 (PN 34600) is a control and monitoring system for fixed aerosol fire extinguishing systems for marine applications.

The purpose of the FS12 system is to control and monitor a number of aerosol generators mounted on a ship as part of a fire extinguishing systems. The primary purpose of the FS12 system is to activate the aerosol generators in event of fire.

The secondary purpose of the FS12 system is to monitor the system itself (e.g. power supplies, cables and individual system components) and give an alarm if a fault within the system is detected.

Linear Heat Detection Equipment

Protectowire Linear Heat Detection Wire

Part Number	Description
PHSC-155-EPC	Linear heat detection cable type EPC 155°F/68°C
PHSC-190-EPC	Linear heat detection cable type EPC 190°F/88°C
PHSC-220-EPC	Linear heat detection cable type EPC 220°F/105°C
PHSC-280-EPC	Linear heat detection cable type EPC 280°F/138°C
PHSC-356-EPC	Linear heat detection cable type EPC 356°F/180°C
PHSC-155-XCR	Linear heat detection cable type XCR 155°F/68°C
PHSC-190-XCR	Linear heat detection cable type XCR 190°F/88°C
PHSC-220-XCR	Linear heat detection cable type XCR 220°F/105°C
PHSC-280-XCR	Linear heat detection cable type XCR 280°F/138°C
PHSC-356-XCR	Linear heat detection cable type XCR 356°F/180°C
PHSC-135-XLT	Linear heat detection cable type XLT 356°F/180°C

TYPE EPC – VINYL JACKET

PHSC-155-EPC 155° (68°C)
Max. Recommended Ambient Temp 115° F (46° C)

PHSC-190-EPC 190° (88°C)
Max. Recommended Ambient Temp 150° F (66° C)

PHSC-220-EPC 220° (105°C)
Max. Recommended Ambient Temp 175° F (79° C)

PHSC-280-EPC 280° (138°C)
Max. Recommended Ambient Temp 200° F (93° C)

PHSC-356-EPC 356° (180°C)
Max. Recommended Ambient Temp 221° F (105° C)

TYPE XCR FLUOROPOLYMER JACKET

PHSC-155-XCR 155° (68°C)
Max. Recommended Ambient Temp 115° F (46° C)

PHSC-190-XCR 190° (88°C)
Max. Recommended Ambient Temp 150° F (66° C)

PHSC-220-XCR 220° (105°C)
Max. Recommended Ambient Temp 175° F (79° C)

PHSC-280-XCR 280° (138°C)
Max. Recommended Ambient Temp 200° F (93° C)

PHSC-356-XCR 356° (180°C)
Max. Recommended Ambient Temp 250° F (121° C)

TYPE PLR-R THERMOPLASTIC ELASTOMER JACKET

PLR-155R 155° (68°C)
Max. Recommended Ambient Temp 115° F (46° C)

PLR-190R 190° (88°C)
Max. Recommended Ambient Temp 150° F (66° C)

TYPE XLT – PROPRIETARY POLYMER JACKET

PHSC-135-XLT 135° (57°C)
Max. Recommended Ambient Temp 100° F (38° C)

Note: Colors shown are for illustrative purposes only. Actual jacket colors may vary.

Protectowire Splicing Connectors and Termination devices

Splicing connector, 2 point (10 pk.)
PN: PWSC

Splicing connector, 3 point (10 pk.)
PN: PWSC-3

Splicing sleeves (10 pk.)
PN: PWS

Flexible leads (pair)
PN: PFL

Series JCT box sealed strain relief
Connectors
PN: SR-502

Non-metallic strain relief connector
PN: SR-502N

Aerosol Fire Suppression

SFTS sealant tape #2228
PN: SFTS
Used to seal all splices before
applying splicing tape.

Splicing tape
PN: 35 Red, white, or blue
Used to protect splices after using
SFTS-1-8-F sealant tape.

Low Temperature Splicing tape, black
PN: 33+
Used to protect splices in cold environments
after using SFTS-1-8-F sealant tape.

Protectowire General Purpose Fasteners

Clips, corner (white)
PN: WAW-N

Clips, nylon (clear)
PN: WAW-P

Clips Line
PN: OHS-1
Use with type EPR, EPC, EPM,
and TRI cable.

Clips, 304 stainless steel with 1/4" hole
PN: OHS-SS

Beam clamp assembly (steel)
PN: BC-2
Consists of beam clamp, WAW clip,
and snap button)

Beam clamp assembly (with nylon clip)
PN: BC-3N

Drive rings
PN: PDR

L-bracket, stainless (rim type seal)
PN: RMC-3

This bracket consists of a steel bracket, WAW clip, and snap button and are often used to mount Protectowire to the rim seals on floating roof tanks.

Insulated standoff
PN: TR-5G
Used to install Protectowire on or above cable conveyors or mechanical structures.

Adhesive cable mount
PN: EMS-A-CO
Requires Sikaflex adhesive.

Cable tie (for EMS-A-CO mounts)
PN: PLT1S-CO

PN: Sikaflex 291
Use with EMS cable mounts, should not be used in chemically harsh areas or areas where temperatures are less than 0°F (-17°C) or exceed 180°F (82°C)

Protectowire Cable Tray Mounting Clips

Mounting clip (ea.)
PN: HPC-2

Mounting clip assembly
PN: CC-2N

Mounting clip assembly
PN: CC-2W

Mounting clip assembly
PN: CC-10N

Mounting clip assembly
PN: CC-10W

Mounting clip assembly with screw and lock nut
PN: CC-10N-S

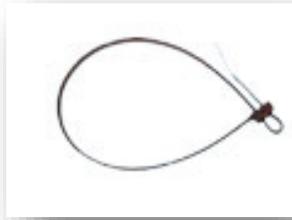

Mounting clip assembly with screw and lock nut
PN: CC-10W-S

Protectowire Sprinkler Pipe Mounting Hardware

Series pipe straps (3/4" to 2" pipe)
PN: PM-3A

Series pipe straps (2-1/2" -3-1/2" pipe)
PN: PM-3B

Series pipe straps (4" to 6" pipe)
PN: PM-3C

Protectowire Wire Installation Equipment

Wire dispensing reel for coils
PN: SU-15

Systems Enclosure Application Worksheet

Project Name: _____

What is the hazard fire class? A, B, or C

What is the volume of the enclosed space? W _____ x D _____ x H _____ = _____
(Width x depth x tallest ceiling)

List all unenclosed openings:

Rectangle or round (circle one) and the W _____ x H _____ or diameter _____

Rectangle or round (circle one) and the W _____ x H _____ or diameter _____

Rectangle or round (circle one) and the W _____ x H _____ or diameter _____

Please contact your local authorized distributor with this information as they have our calculation software and can assist with your project.

Industrial Applications

Industry	System Applications
Utilities / Power Generation	Gas turbine enclosures Diesel generator rooms Switch gear rooms Wind turbine nacelles and power rooms Battery room (lead acid / lithium ion) Generator rooms Electric machine rooms Electric cabinets Transformer rooms
Energy Storage Systems (ESS)	Battery room (lead acid / lithium ion) Power wall
Transportation – Bus	Bus engine compartments
Transportation – Rail	Rolling stock engines and electrical equipment
Transportation & Mobility	Specialty vehicles like cranes Battery compartments (lead acid) Motor control centers Off-road vehicles engine compartments Tunneling equipment
Telecommunications/Cell Sites	Electrical Cabinets Battery Racks
Manufacturing Machines	CNC machines
Manufacturing	Flammable liquid storage Electrical rooms Dust protection (non-explosive) Dust collectors (non-explosive) Robots
Buildings	Elevator machine rooms Flammable liquid storage
Laboratories	Chemical storage Globe boxes Enclosed fume hoods
Oil & Gas	Upstream Midstream

Stat-X First Responder[®]

Stat-X

First Responder[®]

The Stat-X First Responder is our hand-held device. It discharges thru ports on the lower side of the unit, instead of the bottom like the other generators.

Part Number	Description
15001	Stat-X First Responder [®] (4-pack)
15026	Case, yellow for two (2) units with Stat-X label
15050	Mounting bracket, heavy duty
15055	Carry pouch, heavy duty
15090	Locator Sticker, 9" x 4" reflective "Stat-X First Responder"

Stat-X[®]

Aerosol Fire Suppression

Stat-X First Responder
PN: 15001

Case, yellow for two (2) units
PN: 15026

Locator sticker
PN: 15090

Mounting bracket
PN: 15050
